**W**hat sets an airport apart today? It's that distinct connection it makes with travelers — offering adventure, luxury, service, ease, enjoyment. Making that connection requires an enormous, coordinated effort across every function of your airport. Axis airport solutions fit in exactly where you need them, with cutting-edge network video to help you offer something better. That's what raises expectations — not only for your own airport, but for the entire industry.

Attracting passengers, airlines, retailers and investors involves transforming a whirlwind of activity into a secure, appealing experience for everyone. Each group working to make your airport safe, efficient and profitable has specific needs. Success depends not only on giving them tools to function at peak performance, but also on boosting your combined efforts. And that's where Axis can make all the difference.

Before, video surveillance was strictly a security matter. Now, with Axis leading the shift from analog to digital technology, multiple airport functions can benefit from new possibilities with network cameras. With nearly three decades of network know-how, full commitment to open industry standards and strong partnerships, Axis delivers solutions that best answer users' needs — including a complete range of high-quality network cameras, video encoders, video management software and accessories. Our open platform easily hosts

various applications that provide real-time surveillance and work cross-functionally to improve the security, business and operations of your airport.

Take advantage of the market's broadest and most innovative network video product portfolio, offering the highest quality HDTV video for all areas of your airport. Tailor your solution with a wide range of video analytics applications, enabling your cameras to automatically perform intelligent tasks such as facial recognition, people counting, incident detection and tracking. Axis video encoders can also connect your existing analog cameras to the network — leveraging the investments you've already made. Axis network video solutions for airports give you the perfect platform to dream big with a firm foothold in real possibilities. Along with our extensive partner network, we're ready to help you determine your course.

As the market leader in network video, Axis is leading the way to a smarter, safer, more secure world — driving the shift from analog to digital video surveillance. Axis has more than 1,400 dedicated employees in 40 locations around the world and cooperates with partners covering 179 countries. Founded in 1984, Axis is a Sweden-based IT company.
