INTERNATIONAL PERSPECTIVES ON OPEN SYSTEM ARCHITECTURE

2018 ACC/TSA Security
Capabilities Workshop

Arlington, VA
July 26, 2018

Modular Security Example: Army MAPS

International Perspectives on Open System Architectures

- Common goal: the need to more rapidly respond to a dynamic, global evolving threat
- Business incentives for industry and market size
- System component interface and imaging standards (e.g. DICOS)
- Common requirements for cyber security
- Joint R&D efforts for modular systems and components
- Joint policy framework (e.g. IP)
- Common T&E processes for modular systems (e.g. CEP, Machine learning practices)
- More efficient joint acquisition and deployment processes
